

NTT DATA

NTT DATA welcomed Dell Services into the family in 2016. Together, we offer one of the industry's most comprehensive services portfolios designed to modernize business and technology to deliver the outcomes that matter most to our clients.

Inexpensive, Secure and Highly Reliable Storage That is Broadly Accessible Via the Internet

Cloud Storage as a Service by NTT DATA and ScaleMatrix

NTT DATA Services
formerly Dell Services

Cloud Storage as a Service

NTT DATA Services takes the uncertainty out of the cloud with a customer-centric approach to help your organization take full advantage of the cloud. We combine intellectual properties with a wide range of partner technologies to deliver unique, optimal performance based on your application needs and the business outcomes you demand.

NTT DATA and ScaleMatrix

We have partnered with ScaleMatrix to bring you a cloud based Storage as a Service (STaaS) solution. Cloud storage is reliable and secure, while offering availability anywhere via the Internet. Cloud based storage is often far more cost effective than local hardware or SAN based solutions.

Key benefits:

- Cost effectiveness – pay only for what you need
- Flexibility – easily increase or decrease usage
- Security – highly secure and encrypted environments protect your data
- Availability – accessible anywhere via the Internet

Volume-based dynamic cache

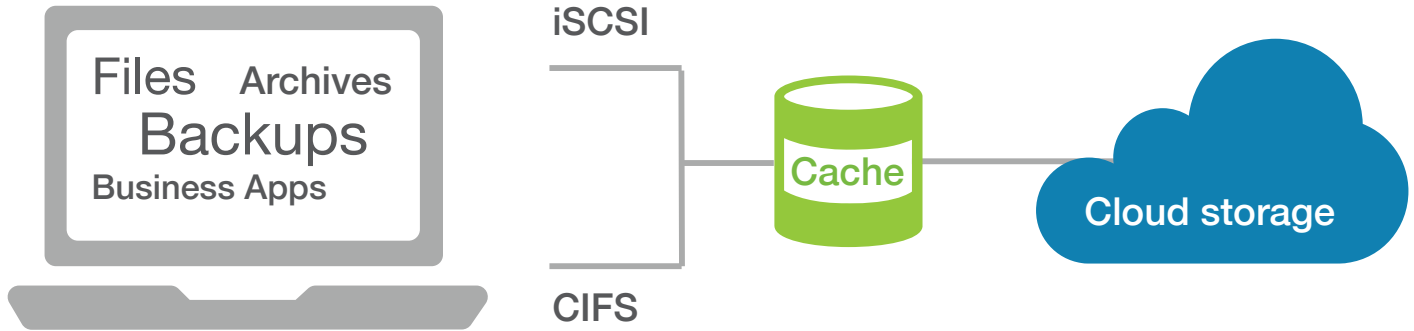

In-cloud snapshots

Encryption

Data reduction

Automatically store or replicate data to the cloud

STaaS gives you nearly unlimited space and offsite data protection in one easy package. ScaleMatrix Cloud Storage's ability to present as both an iSCSI or a NAS (CIFS / NFS) device means that it works with almost any host platform (including Windows, Linux, VMware, etc.)

Maintain local performance

Cloud storage's local cache makes your most important data immediately accessible. With a sophisticated cache policy manager, you can also dictate exactly how much data is cached for each volume.

Nearly unlimited capacity at a price you can afford

With ScaleMatrix STaaS, you have access to nearly unlimited storage at a price you can afford. Pay only for what you need and store in the Cloud.

Encrypt your cloud data in flight and at rest

ScaleMatrix STaaS was built from the ground up with the security you need to confidently store data in the cloud using sophisticated 256-bit AES encryption.

Save space with lightweight snapshots

ScaleMatrix STaaS uses snapshots to preserve a view of your data at a specific moment, similar to volume-level SAN snapshots. Since ScaleMatrix STaaS snapshots take place in the cloud, no additional bandwidth is required.
